OUR TECH CULTURE:

- We are creating a highly scalable platform is based on microservices, REST and RabibitMQ;
- We code according to PHP-FIG standards and use community based frameworks and libraries;
- We use SQL and NoSQL depending on the task, and New Relic to make it easier.

WHAT WILL YOU DO:

- You will be designing a structure today, robust enough to deal with potential challenges tomorrow;
- Write clean, tested and documented PHP code to a high standard, in a timely and scalable way;
- Work with blockchain technologies and cryptocurrencies - the hype of today;
- Cooperate with the team to deliver the best technology based solutions and raise business value;
- Be a part of such API creation, that all developers are excited to use;
- Work using microservices, continue integration and fully implemented deployments.

WHAT WE EXPECT FROM YOU?

- At least 2 years of experience working with PHP and Laravel/Symfony;
- Relevant experience in building highly scalable systems;
- Git, OOP, Redis are embedded in your everyday life;
- Personal drive and hunger for knowledge;
- English language is a must - we are international.

WHAT'S IN IT FOR YOU?

- You will be building a platform, where education is revolutionised via Blockchain;
- You will be a part of the first company to create cryptocurrency legally in Lithuania from start to finish;
- A culture of truly high standards and fast pace learning environment.
- An amazing team - both professionally and personally;
- Freedom and the responsibility to think of solutions, not just do what you are told.
- You will have no legacy to code to clean up - everything is open for you to create.
- Anything needed for your fast development: global workations, world's best conferences, relevant training courses, books, team building activities and workshops.
