

LOOKING FOR PRODUCT OWNER

Workplace: Kaunas, Lithuania

This is a green field project, so a true visionary will get the chance to develop the platform from start to finish, make their ideas reality and build something that can actually make a big difference - making a small difference is just as hard, so we opt for BIG.

WHAT WILL YOU DO:

- Create and drive the product strategy;
- Take care of a full-cycle product development and manage the resources to implement it;
- Create and maintain the product backlog;
- Work together with the team to set implementation details and timelines;
- Oversee project grooming and architecture planning.

WHAT WE EXPECT FROM YOU?

- Previous working experience as a Product Owner in software development;
- In-depth knowledge of Agile process and principles;
- Outstanding communication, analytical and problem solving skills;
- Ability to lead a cross-functional team and adapt to a fast-paced environment;
- You should be clever and creative - surprise us with your solutions;
- Result orientation and multitasking is second nature to you.

WHAT'S IN IT FOR YOU?

- You will be building a platform, where education is revolutionised via Blockchain;
- Since this is a greenfield project - everything is open for you to create;
- You will be a part of the first company, who created cryptocurrency legally in Lithuania from start to finish;
- Culture of truly high standards and fast pace learning environment;
- Amazing team - both professionally and personally;
- Freedom and the responsibility to think of solutions, not just do what you are told;
- Anything needed for your fast development: global workations, world's best conferences, relevant training courses, books, team building activities and workshops.
